

Technical project execution for B2B

Defined installation packages from Woerden

Informational English version | version 1.0 | 3 September 2026 | Dutch version is primary

AZ Grand Solutions vof carries out defined work packages for business clients covering plumbing and pipework, thermal systems and ventilation. Project location, scope, planning, capacity and interfaces are assessed in advance for each request.

Technical capabilities

Plumbing and pipework	Thermal systems	Ventilation
Pipework, connection points, sanitary fixtures, pantries, toilet areas and technical rooms within the agreed work package.	Heating pipework, radiators, manifolds and underfloor heating, coordinated with floor build-up, connection points and project planning.	Ventilation ducts, penetrations and connection points within a defined scope, coordinated with construction and installation partners.

Client types

Requests are assessed for, among others:

contractors and construction companies	property managers	hospitality and hotels
offices and retail	owners associations	installation and ventilation companies

B2B project area

Project locations are assessed from Woerden. Orientation points: Breda, Tilburg and Eindhoven to the south; Purmerend and Beverwijk to the north; The Hague, Rotterdam and Leiden to the west; Lelystad and Zwolle to the east. Named places do not guarantee acceptance or full coverage. Other locations only after project assessment.

Cooperation and project information

How we cooperate

1. Request	Project location, scope, phase, planning, building type and contact person.
2. Assessment	Check of services, project area, information and dependencies.
3. Definition	Work package, materials, connection points, access, exclusions and responsibilities.
4. Quotation	Price basis, planning and B2B terms are supplied before conclusion.
5. Execution	Coordination with work zones, site sequence and interfaces with other teams.
6. Handover	Checks and completion points within the assigned scope; follow-up is identified separately.

Information for a focused quotation

Where available, please provide:

- company, contact person and role
- project location and building type
- plumbing, thermal-system or ventilation scope
- project phase, preferred period and high-level planning
- drawings, work description, quantities and known connection points
- access, work zones and coordination with other parties
- preferred one-off or ongoing cooperation, without assuming an SLA

Allocation of roles

AZGS within the agreed scope • execution of the agreed installation package • practical coordination of sequence and interfaces • reporting visible deviations that affect execution • checks and feedback for assigned completion points	Client and appointed parties • design, calculations, permits and timely decisions • approved drawings, dimensions and released work zones • specialist inspections, commissioning and certification where required • access, coordination and project conditions outside the AZGS scope
---	---

Project conditions

Certification, insurance, warranty, retention, testing, inspection and documentation are not confirmed by this statement. Project-specific requirements must be checked and agreed in writing in advance. No public SLA applies. Business emergencies are assessed separately only for a plumbing, thermal or ventilation installation previously carried out by AZGS itself.
